

Mohammad Arif Siddiqui

arifsiddiqui244@gmail.com | +91-7905581327

Education

Feroze Gandhi Institute of Engineering & Technology
Bachelor of Technology in Computer Science and Engineering

Raebareli
2014 to 2018

Experience

Reliance Jio

Software Development Engineer(SDE 2)

Bengaluru
01/2022 to present

- Designed and implemented a microservices architecture on GKE using Node.js, which resulted in a **10% reduction in deployment time** and improved **system reliability by 10%**, leveraging auto-scaling and resource management.
- Developed and optimized microservices that expose APIs capable of supporting **50,000 transactions per second** during high-traffic events like the IPL, ensuring robust performance, scalability, and reliability under extreme load conditions, leading to a **15% increase in user engagement** and a **20% increase in revenue**.
- Implemented caching mechanisms that reduced **database load by 10%** and improved **response times by 10%** in high-traffic scenarios.
- Integrated NoSQL databases for high-throughput, low-latency data access, optimizing data storage for scalability and reducing **data retrieval times by 10%**.
- Set up comprehensive monitoring and alerting systems for real-time observability, which decreased **mean time to resolution (MTTR) by 20%** and ensured rapid issue resolution.

Polestar Solutions & Services India Pvt. Ltd.

Sr. Software Engineer

Noida
10/2020 to 01/2022

- Created and automated a data integration module using Node.js and Redis for seamless data transfer to Anaplan, with PostgreSQL schema design ensuring scalability and efficiency, resulting in a **20% improvement in data processing speed**.
- Developed and deployed Azure IoT Edge modules using Node.js for filtering and transmitting sensor data to Azure Cloud Storage, with Docker managing containerized deployment.

Software Engineer

03/2018 to 10/2020

- Developed microservices with Node.js and Express.js, implementing JWT authentication, data processing, and APIs for efficient data handling, and integrated WebSockets to fetch real-time data from Qlik Sense for dynamic reporting and analysis.

SKILLS

Server-side: Javascript, Node js, Express js, REST, Nginx, Redis, Kubernetes, RabbitMQ.

Database: MongoDB, MySQL, Elasticsearch.

ORM: Mongoose.

Cloud: AWS, GCP, Azure.

Projects

Jio Coupon Network (JCN)

Affiliate e-commerce platform

- Developed and led key modules including Sponsor/Offer and Winner/Coupon Upload, handling high transaction volumes.
- Integrated Kubernetes into the CI/CD pipeline to improve scalability and reliability.
- Contributed to system monitoring, log management, and reporting modules.

Sangam

Data integration platform for Anaplan

- Designed and developed a data integration module, automating data uploads from SFTP/FTP and databases.
- Led the development of a user authentication module and optimized large-scale data processing.
- Deployed the application using Docker for enhanced scalability.

Vanderlande IoT Edge

IoT platform for sensor data processing

- Developed data processing modules for sensor data transmission to Azure cloud storage.
- Collaborated with clients to design modules for Azure IoT Edge, ensuring secure and efficient data handling.
- Implemented Docker container synchronization and log collection using Fluent Bit.

Sales Analytics

Data platform for HCL mobile team

- Developed API integrations with Qlik Sense, retrieving data using WebSocket.
- Created the database schema and data processing modules, including JWT authentication.

Steve Madden Qlik Sense Extension

Data export tool for Qlik Sense

- Developed an extension to export Qlik Sense table data into Excel, incorporating image data.
- Created the API and data processing modules.

Achievements

- Solved **1000+ DSA problems** across platforms like LeetCode, GeeksforGeeks, and HackerRank, enhancing problem-solving and coding efficiency.
- Annual star performer award(2022-2023).
- Superior performer Award, Q3 2020.
- Winner of the Qlik Partner Innovation Challenge, December 2019.
- Superior performer Award, Q4 2018.
