

HAREESH K M

Software Developer | +918086861306

hareeshkizhakkedath@gmail.com | www.linkedin.com/in/hareesh-k-m-699ab8165

PROFESSIONAL SUMMARY

Passionate and outcome-oriented Software Developer with 6.5 years of experience in backend development, cloud computing, and application maintenance. Skilled in designing scalable web applications, cloud migrations, and microservices architecture. Strong expertise in AWS, Node.js, and database management, with a proven record of leading teams and delivering projects on time

SKILLS

- **BACKEND:** Node.js, Express.js
- **FRONT END:** HTML, CSS, Javascript
- **Databases:** MongoDB, SQL, DynamoDB, Redshift
- **Cloud & DevOps:** AWS (Lambda, S3, EC2, API Gateway, DynamoDB, Cognito, IAM), Docker, Kubernetes, Redis
- **Testing & Tools:** REST API, Postman, GitHub, NPM, Chai, Mocha, TDD
- **Methodologies:** Agile, Scrum, Lean
- **Industrial Knowledge:** LEAN, AGILE, TRADE FINANCE

RELEVANT EXPERIENCE

Happiest Minds Technologies | Module Lead (Oct 2023 - Present)

- Designed and developed a web application from scratch using Node.js, Express.js, SQL, and MongoDB, ensuring scalability, high performance, and maintainability.
- Deployed and managed the application on AWS Cloud (EC2, RDS, S3) for optimized hosting, storage, and database operations.
- Led a cross-functional team of 4 members (frontend and QA) by managing daily tasks, providing technical guidance, and ensuring on-time feature delivery.
- Improved backend performance by over 50% through Redis caching, reducing API response times and increasing system efficiency.
- Collaborated with product and business teams to gather requirements and translate them into scalable technical solutions aligned with business goals.
- Worked with Solutions Architects to design high-level architecture and ensure best practices for system design, security, and cloud compliance
- Conducted code reviews to maintain quality, enforce coding standards, and mentor junior developers in backend development best practices.
- Built and integrated AWS services (Lambda, DynamoDB, Cognito, S3) to develop serverless components and secure authentication flows.
- Led cloud migration from on-premises infrastructure to AWS Cloud, achieving minimal downtime and improved scalability.
- Partnered with DevOps teams to troubleshoot deployment and CI/CD issues, contributing to automation improvements and faster production releases.
- Participated in Agile ceremonies including daily stand-ups, sprint planning, retrospectives, and backlog grooming to ensure continuous delivery and alignment with business objectives.

Technology used: Node.js, Express, MongoDB, Sql, AWS Lambda, S3, API Gateway, Dynamo DB, Cognito, IAM, Redis, docker

Numocity | Software Engineer (Feb 2022 - OCT 2023)

- Developed backend services using Node.js, Express.js, MongoDB, MySQL.
- Collaborated with business teams to create architecture and execution roadmaps.
- Built microservices using Azure Functions, deployed on Azure.
- Applied TDD with Chai and Mocha
- Created technical documentation in Confluence and Miro.
- Optimized APIs for 50% faster data retrieval.

Technology used: Node.js, Express.js, MongoDB, SQL, Docker, Azure Functions, Chai, Mocha

Tata consultancy Service | Software Engineer (Jan 2019 - Jan 2022)

- Developed applications for a leading European bank in trade and motor finance sectors
- Built microservices using Node.js, Socket.io, Docker, Kubernetes, and React on Google Cloud.
- Applying of TDD, experience of writing efficient unit tests

Technology used: Node.js, Express.js, MongoDB, SQL, Docker, Chai, Mocha, React, HTML, CSS

EDUCATION

- University of Calicut - B.Tech | CGPA: 7.2 (Jul 2014 - May 2018)
 - G.H.S.S Chathanur - Plus Two | 90% (Jul 2012 - May 2014)
-

CERTIFICATIONS

- The Complete Node.js Developer Course (3rd Edition) from Udemy
- The Complete 2020 Web Development Bootcamp from Udemy
- Microservices with Node JS and React from Udemy
- Become a Product Manager | Learn the Skills and Get the Job from Udemy
- Programming, data structures and algorithms using Python from NPTEL
- AWS AppSync & Amplify with React & GraphQL Complete Guide from Udemy
