PROFESSIONAL SUMMARY

Results-driven Software Engineer with over 9 years of experience in designing, developing, and delivering scalable software solutions across diverse domains including e-Commerce, insurance (insurtech), multilevel marketing (MLM) applications, and NFT-based platforms. Skilled in back-end development, database design, and API architecture, with strong collaboration experience in building solutions aligned with UI/UX design principles to enhance user experience and system performance.

Demonstrated ability to lead projects, manage multiple codebases, and collaborate effectively with cross-functional teams to ensure high-quality product delivery. Strong communicator and strategic thinker with a focus on innovation, system optimization, and alignment of technical solutions with business objectives. A continuous learner passionate about emerging technologies and driving digital transformation.

WORK EXPERIENCE

Lead Software Engineer – **KennedysIQ**

Aug 2023 – Nov 2025

- Led hands-on development of a large-scale disease claims processing platform, contributing code daily while owning backend services end-to-end.
- Designed, built, and maintained **Node.js microservices** and RESTful APIs to process high-volume claimant data including employment, medical, and audiometry records.
- Implemented complex business logic for inflation-adjusted compensation calculations and historical settlement analysis, improving accuracy and auditability of claim outcomes.
- Enhanced the NIHL assessment module by automating audiometry-based calculations and generating detailed, production-grade reports used by legal and insurance teams.
- Collaborated closely with product, legal, insurance, and medical stakeholders to translate domain requirements into scalable technical solutions.
- Actively reviewed code, enforced clean coding standards, and mentored junior engineers while continuing to contribute 70–80% through hands-on development.
- Improved system performance and reliability by optimizing database queries and API workflows.
- **Tech Stack:** Node.js, Express.js, PostgreSQL, Sequelize, JWT, Docker, RESTful APIs, Azure, FastAPI

Sr. Software Engineer - **Accubits Technologies Inc**

Feb 2022 – Aug 2023

- Worked as a backend developer using **Node.js** and **Express.js** for building scalable APIs and server-side applications.
- Contributed to multiple **blockchain and cryptocurrency projects**, including NFT marketplaces and crypto-related solutions.
- Successfully delivered 5+ projects, with most being NFT marketplace and blockchain integrations.
- Collaborated with cross-functional teams to implement product features, optimize back-end workflows, and ensure secure transaction processing.
- Gained experience in designing, developing, and maintaining systems for digital asset management and crypto-based applications.
- **Tech Stack:** Node.js, Express.js, PostgreSQL, MongoDB, Blockchain, NFTs, RESTful APIs, AWS.

Senior Software Engineer – Centre Source Consultancy Services Pvt Ltd

Mar 2021 – Jan 2022

- Worked as a senior backend engineer building scalable server-side applications using **Node.js**, **Express.js**, and **Strapi** for multiple client platforms.
- Designed and developed RESTful APIs supporting CRM systems, e-commerce platforms, and enterprise applications used in production environments.
- Applied modular and service-oriented design principles to improve maintainability, scalability, and deployment velocity.
- Collaborated with frontend engineers and product stakeholders to ensure seamless integration and reliable feature delivery.
- Participated in code reviews, debugging sessions, and performance tuning to maintain high code quality across projects.
- **Tech Stack:** Node.js, Express.js, Strapi, PostgreSQL, MySQL, RESTful APIs, Git

Sr. Software Engineer - **Epixel solutions Pvt Ltd**

Jul 2016 – Mar 2021

- Worked on **blockchain, mobile, and web development projects**, handling complex challenges related to real-time cryptocurrency and monetary transactions.
- Determined coding requirements for websites, including **e-commerce functionality** and specialized scripts, ensuring scalable and efficient design.
- Conducted thorough testing and troubleshooting prior to deployment to ensure smooth, error-free operations.
- Migrated legacy data into new systems using optimized algorithms to ensure data integrity and system compatibility.
- Successfully addressed complex challenges related to various compensation plans and devised effective solutions.
- Researched and proposed software solutions compatible with emerging technologies and future requirements.
- Developed reusable code structures and modular components to efficiently solve specific tasks and enhance maintainability.
- **Tech Stack:** Golang, Django, Drupal, NodeJs PostgreSQL, MySQL, Blockchain, RESTful APIs.

EDUCATION

- **Masters of Business Administration (MBA) in General**
Bharathiar University, Coimbatore
Jun 2021 – Apr 2023 (*Distance Education*)
- **Diploma in Computer Science and Engineering**
Seethi Sahib Memorial Polytechnic College, Tirur
Jun 2013 – Apr 2016, Marks Obtained: 84%
- **Vocational Higher Secondary in Computer Science**
Government Vocational Higher Secondary School, Nellikuth
Jun 2011 – Apr 2013, Marks Obtained: 80%

SKILLS

Programming Languages	Node.js, Golang, Python, PHP, JavaScript
Frameworks & Libraries	Express.js, React.js, Next.js, Strapi, Gin, Django, Drupal 7, CodeIgniter
Backend Architecture	RESTful APIs, Microservices Architecture, Distributed Systems
Databases	PostgreSQL, MySQL, MS SQL, MongoDB, Vector Databases, GraphQL
Cloud & Hosting	AWS (EC2, RDS, Lambda), Azure, cPanel
DevOps & Tooling	Git, Docker, Kubernetes, REST APIs, CI/CD Pipelines
Domains	E-Commerce, High-Scale Systems, SaaS Platforms, InsurTech, Web3
