SUMMARY

Experienced software engineer with 5 years of experience in designing and managing scalable solutions and advanced architectures. Skilled in developing both backend services and frontend interfaces, and proficient in deploying and maintaining infrastructure in cloud environments.

EDUCATION

B.Tech, Civil Engineering

NIT Durgapur, West Bengal, IN

Graduated May 2021

8.20 GPA

Relevant coursework: Data Structures and Algorithms, Database Management Systems

TECHNICAL SKILLS

Backend Development: NestJS, Node.js, Redis, Elastic Search, Kafka, Docker, Kubernetes, Postgres, MongoDB

Frontend Development: Html, Css, React, TypeScript, Redux, Storybook, Scss, Tailwindcss, Firebase

Programming: Java, Javascript

Cloud Infrastructure : AWS (EC2, S3, RDS, EKS, ECS, EC2, Route53, Cloudfront), Firebase, Google Big Query

Achievements: AIR 43 among 19.5K+ participants (Amazon HackOn Coding Challenge 2022) – June 2022

PROFESSIONAL EXPERIENCE

Medi Assist, Bangalore, IN: Software Engineer 2

May 2023 – Present

- Spearheaded development and optimization for HealthTech and InsurTech applications using a tech stack including React, Redux, NestJS, TypeScript, Docker, and Kubernetes, with deployment on AWS services such as S3, EKS, EC2, Route 53, RDS, and CloudFront.
- Enhanced web application performance through advanced load testing, API profiling, and implementation of microfrontend architecture with web components.
- Developed a centralized configuration management system with NestJS and Mongoose, boosting consistency and ease of maintenance.
- Optimized data handling and messaging by leveraging Redis and RabbitMQ in NestJS microservices.
- Implemented push notifications using Firebase Cloud Messaging, managing FCM tokens and their lifecycle in PostgreSQL.
- Deployed a custom npm registry with Verdaccio to streamline package management.

ElevateHQ, Bangalore, IN: Software Engineer

Dec 2022 – May 2023

- Designed and developed scalable microservices using NestJS with containerization and orchestration via Docker and Kubernetes.
- Created micro frontend solutions with React, TypeScript, and Redux, integrating these with backend services and leveraging Strapi for content management.
- Deployed and managed infrastructure on AWS, including EC2, S3, and RDS, to ensure robust and scalable solutions.

Wipro, Bangalore, IN: Software Engineer

June 2021 – Dec 2022

- Developed and maintained scalable applications using the MERN stack (MongoDB, Express.js, React, Node.js) with a focus on robust authentication and authorization via JWT and Google OAuth2.0.
- Utilized Git, GitHub, and GitHub Actions to streamline development, version control, and deployment processes.
- Fostered strong client relationships and contributed to business growth through effective project management and high-quality software delivery within agile teams

Mathongo, Bangalore, IN: Software Engineer Intern

Dec 2020 – Jun 2021

- Developed an OCR Render Panel and Tracker Analytics Dashboard using the MERN stack, and contributed to the backend of Quizrr, a high-traffic platform handling over 18,000 concurrent users.
- Collaborated with senior engineers and mentors to implement best practices, significantly enhancing software development skills and personal growth.
